P. FISHER, NEWSPAPER ADVERTISING AGENT, 21 Merchants' Exchange, San Francisco, is our authorized agent. This paper is kept on file in his office.

Official Paper of Cochise Co.

THURSDAY, SEPTEMBER 21, 1899.

The death of Cornelius Vandebilt scarcely caused a ripple on the stock markets of the country. Death of rich men all remind us—that dying rich we leave behind us our hard earned money. To obviate this we will stick to the newspaper business.

CONTRARY to the belief of many people, the day of placer mining is just opening. But heretofore the work will be carried on on a very different scale from what it has been in the past. The machinery to handle low grade dirt is expensive and difficult to install, but the fact remains that few branches of mining offer so great returns for so small an expenditure as scientific placer mining.

The Mexican congress was opened on Friday night of the 16th. The message of President Diaz was very voluminous, treating, as it did, of the progressive achievements of the nation and the bright outlook for the future. His recommendations for the continued support of the country in adopting progressive ideas were well received. It is probable that congress will grant him leave of absence to visit the United States this winter.

Just at this time the United States and England are both engaged in pouring troops across the sea, we to civilize and otherwise benevolently assimilate the Philippine; Great Britain to civilize and otherwise benevolently assimilate the Boers. Our purposes appear to be much the same. We should form the Anglo-American alliance without delay and adopt the same coat-of-arms—rifles crossed, two jugs of rum and an unopened Bible.

It looks as if progress in the manufacture of ice will soon make it possible to feed water into one end of a machine, which can be called a press, and have it deliver chunks of ice of any size at the other end. The Patent Record says: "Artificial ice, manufactured at one-fifth the cost of ice from the northern lakes and rivers, is what Major D. L. Holden, of Philadelphia, claims to be the result of his invention, which makes ice almost automatically. Anhydrous ammonia is boiled, or evaporated, in a hollow cylinder which revolves in a tank of water. The temperature of the cylinder shell is reduced to 32 degrees below zero, causing ice to form at the rate of one quarter of an inch per minute on the outside of the cylinder. A series of knives arranged on the cutter-bar keep the ice cut down to the skin of the cylinder. The ice shavings float under a hood in which is a screw conveyor, which carries the ice and a certain quantity of water along to two presses. The water is then drained through perforations back into the tank, and when an indicated weight of ice is collected, a hydraulic power transfers the ice to the other press, where it is pressed and regaled for use."

Or late the hotbed of race warfare seems to have been transferred to Illinois. Over a year ago the importation of negro miners from Alabama was commenced in order to fill the places of the striking coal miners who had gone out three months before. The arrival of the first trainload of negroes was the signal for a series of battles which have caused terrible loss of life and property and have entailed very great expense on the state. The governor has several times taken things in his own hands and has sent state troops to the scene of the trouble. The people of the affected communities appear to resent the presence of the troops, preferring to be let alone to kill the negroes by wholesale without interference. This is one of those problems which require far more than bayonets and bullets to settle them. It is a problem deep as the foundations of the republic, and its solution involves reconstruction of the declaration of independence and the federal constitution. But in its practical workings the usual solution has gone in direct opposition to these venerable documents. Truly it appears that we have not yet advanced to a point where we can consistently carry out the good resolutions our fathers wrote in their blood at the dawn of the republic—El Paso Times.

The great success of Chamberlain's Colic, Cholera, and Diarrhoea Remedy in the treatment of bowel complaints has made it standard over the greater part of the civilized world. For sale by all Druggists.

Crippled by  
Rheumatism.

Those who have Rheumatism find themselves growing steadily worse all the while. One reason of this is that the remedies prescribed by the doctors contain mercury and potash, which ultimately intensify the disease by causing the joints to swell and stiffen, producing a severe aching of the bones. S. S. S. has been curing Rheumatism for twenty years—even the worst cases which seemed almost incurable.

Capt. O. E. Hughes, the popular railroad conductor, of Columbia, S. C., had an experience with Rheumatism which convinced him that there is only one cure for that painful disease. He says: "I was a great sufferer from muscular Rheumatism for two years. I could get no permanent relief from any medicine prescribed by my physician. I took about a dozen bottles of your S. S. S., and now I am as well as ever was in my life. I am sure that your medicine cured me, and I would recommend it to any one suffering from any blood disease."

Everybody knows that Rheumatism is a diseased state of the blood, and only a blood remedy is the only proper treatment, but a remedy containing potash and mercury only aggravates the trouble.

S.S.S. For The Blood

being Purely Vegetable, goes direct to the very cause of the disease and a permanent cure always results. It is the only blood remedy guaranteed to contain no potash, mercury or other dangerous minerals.

Bottles mailed free by Swift Specific Company, Atlanta, Georgia.

NOTICE OF FORFEITURE.

SWEETSTAKES MINE.

To James A. Nolley, your heirs or assigns: You are hereby notified by the undersigned, your co-owner in the Sweetstakes mining claim, situated in the Wilcox Mining District, in the County of Cochise, Territory of Arizona, the location notice of which is recorded in the office of the County Recorder of the County of Cochise, in book 8, page 600, Record of Mines, that it has expended the sum of one hundred dollars in each of the years from and including the year eighteen hundred and eighty-seven, to and including the year eighteen hundred and ninety-eight, making a period of twelve years, in the performance of the annual work for each of said years, required by the laws of congress to be performed upon said claim to hold the same.

And you, your heirs and assigns, have failed to contribute your proportion of the expenditures required by section 2324 of the revised statutes of the United States, to be made upon said claim for the years from and including the year eighteen hundred and eighty-seven, to and including the year eighteen hundred and ninety-eight, making a period of twelve years. The sum due from you, your heirs or assigns to the undersigned, your co-owner, is hereby notified by this notice, that if you should fail or refuse to contribute your proportion of the above expenditure within ninety days after the publication of this notice once a week for ninety days, your interest in the Sweetstakes mining claim will become forfeited to, and the property of your co-owner, the undersigned, whose residence and place of business are at Bisbee, Cochise County, Arizona.
